

LearnHaas.com

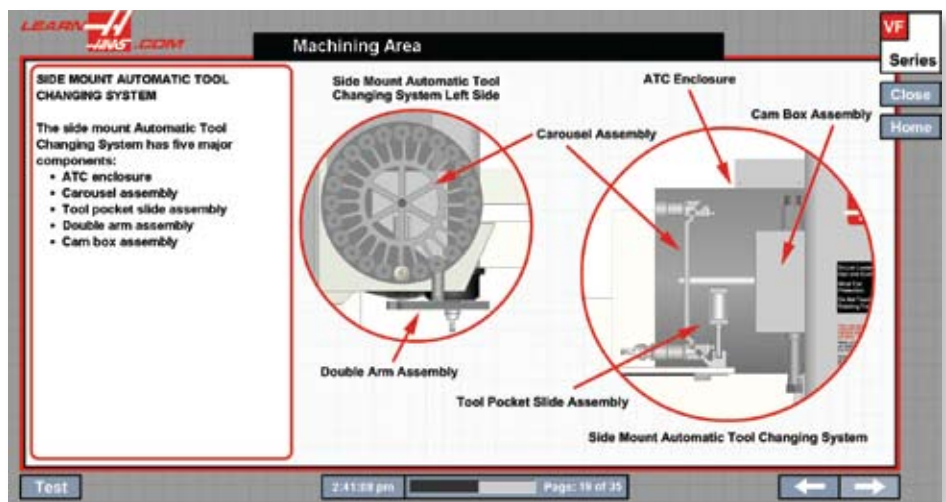

Your Partner in Workforce Education

Your students selected the best school for pursuing their career.

You selected the best tools on which to teach them.

Now you can choose the *best* educational option for guaranteeing success.

Training on Your Terms™

Introducing LearnHaas.com

Oxygen Education knows that educating the workforce is no little task. That is why we created LearnHaas.com, the award-winning solution for training your workforce.

How can we make this claim?

Our products and methodologies have been tested and judged by some of the most prominent learning organizations and our peers. Our most current awards include:

- 2007 Brandon Hall Excellence in Learning: Bronze medal for Best Custom Content
- E-Learning Guild's DemoFest 2007: Best of Show
- E-Learning Guild's DemoFest 2007: Best Product/Service Provider

Why should you partner with LearnHaas.com?

We are committed to giving our partners peace-of-mind in knowing that their students are mastering the skills and competencies needed to successfully perform their duties when out in the workforce.

Our courseware creates a safe, visual, and stand-alone learning environment that allows the students to learn at their pace. It can also be used as a supplement to the instructor's existing training.

Increased Learning

The LearnHaas.com format uses simulation-based learning. This interactive format shortens the learning process and results in 25% to 50% higher retention.

Cost-effective

Without travel time or expenses, customers realize a cost savings between 40% and 60%.

Consistent Training Message

Course material is presented exactly the same way every time, eliminating dependency on the instructor's availability, knowledge level, and communication style.

Just-in-time Training

Learning on-demand when and where you need it. Unlimited training 24 hours/day, 7 days/week.

Competency-based

Every student must pass periodic exams to progress through the course. This ensures that student success is measured by mastery of machine-specific knowledge and skills, not by time spent in a classroom.

Learning Metrics

LearnHaas.com provides a variety of tools to monitor student's progress and produces detailed usage reports.

Self-paced Courses

Students learn at their own speed. This helps to ensure that 100% of the learning objectives are met 100% of the time by every participant.

Resource Library

After the initial training is completed, students have unlimited access to the courses for reinforcement, task reference, and troubleshooting support.

Courses Available

LearnHaas.com is ready to help with all your workforce development needs.

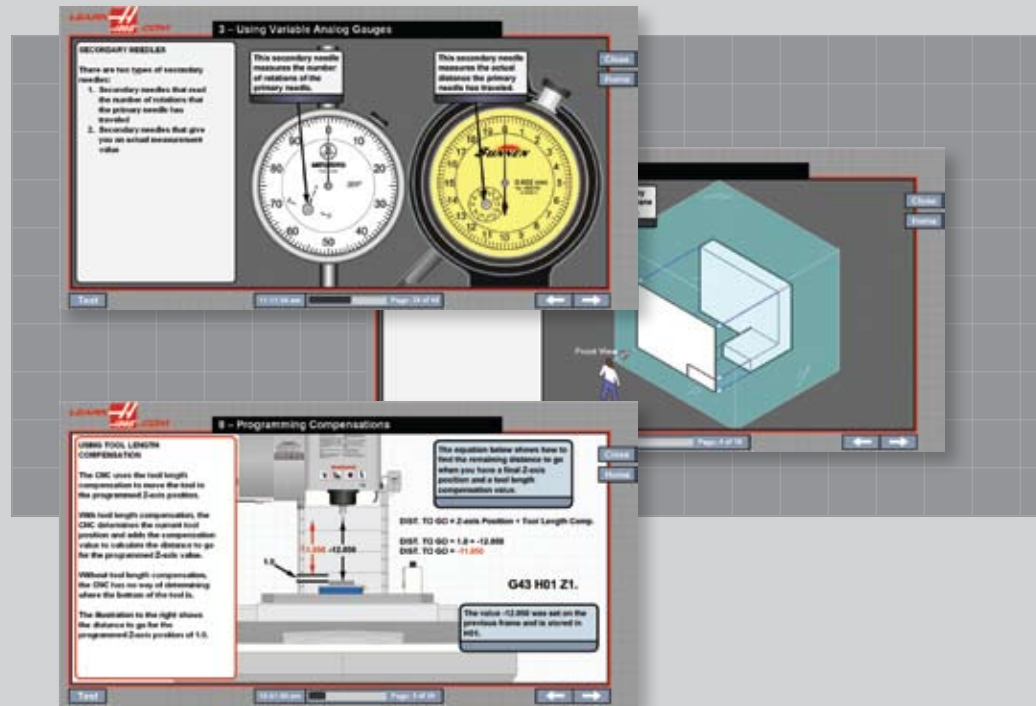

Our library of courses includes courses on machine operations, the CNC Pendant, and two types of programming for the following machines:

- **TM Series**
- **TL Series**
- **VF Series**
- **SL Series**

We also offer the following General Manufacturing Skills courses:

- **Basic Math**
- **Blueprint Reading**
- **Using Shop Gauges**
- **Statistical Process Control**

New courses are added frequently so don't miss the chance to improve the effectiveness of your workforce.

Introducing AME21™

AME21™ is Oxygen Education's Advanced Manufacturing Education for the 21st Century™ curriculum.

The AME21 curriculum delivers over 300 hours of highly interactive, competency-based courses that ensures your employees and students will have the skills mastery required to be successful in an Advanced Manufacturing environment. The AME21 includes four paths of educational opportunity:

- **Foundational Skills**
- **Level 1 - Technologies in advanced manufacturing**
- **Level 2 - Technology specific education**
- **Level 3 - Advanced systems, technologies and leadership**
